2.0 Audit Process

2.1 Audit Objectives

The objectives of the audit are to verify the management system conforms with all the requirements of the MSPO standards and that the organization has effectively implemented the planned MSPO management system as well as to check if the management system can achieve the organization's policy objectives.

2.2 Audit Methodology

The Initial Certification Assessment (Stage 2) was conducted on 27th November 2019 and Annual Surveillance Audit Year 1 (ASA-1) on 23rd February 2021 at Ecco Certified Sdn Bhd (Remote Audit). In both audits, the audit team did a check on facilities and structures available in the estate such as site office, workers' quarter and storage area virtually. The team also did inspections to see the operational site of the estate such as road maintenance, terracing on steep areas, cover crop maintenance, any natural stream or waterway, block maintenance (spraying, manuring and fronts stacking) as well as the estate boundary to verify the implementation of the MSPO (MS2530-3:2013) Part 3: General Principles for Oil Palm Plantations and Organized Smallholders virtually. Interviews were carried out with the team management, employees, contractors and other relevant stakeholders. Documents and records verification was also done to further support and validate findings from initial year audit. The methodology for collecting objective evidence is physical site inspection, observation of tasks and processes, interviews with management, employees and workers, consultations with contractors and stakeholders as well as documents review and data monitoring. The audit evidence obtained were based on samples of information available, thereby introduces the element of uncertainty.
